Reversed Time

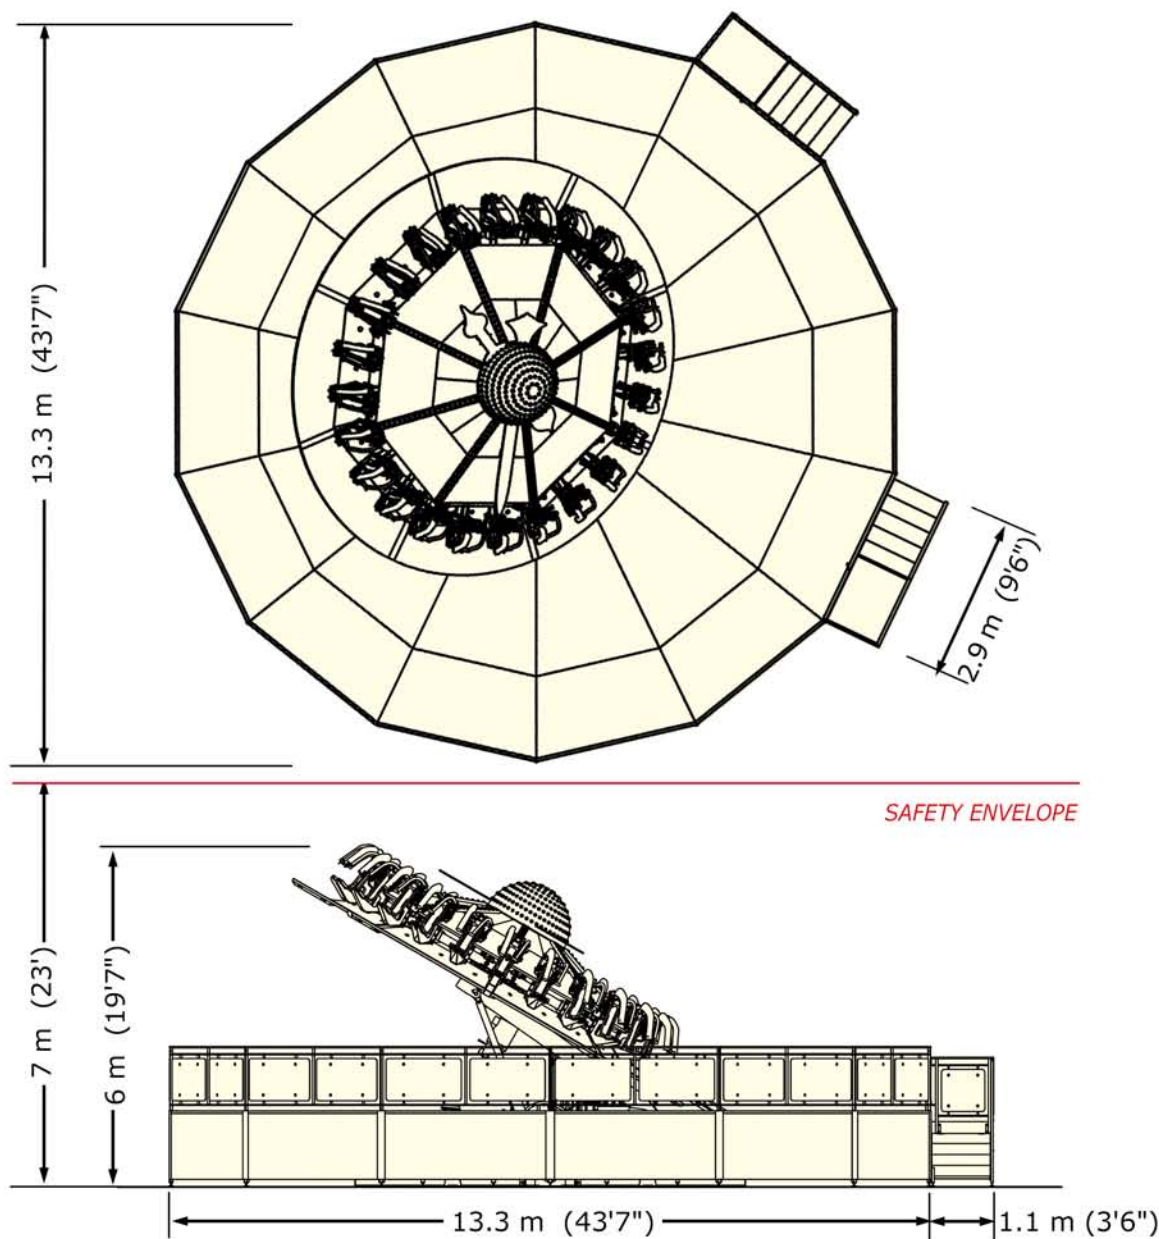

SBF-VISA Group has decided to revive the old ride called "Ballerina", developing the new attraction "Reverse Time".

The movements are the same classic ones, with a maximum height of 6m during operation, but the characteristics of the seats have changed: they are still along the perimeter of the revolving platform, but now there are 24 single seats with over-the-shoulder safety bars, and the riders sit with their legs dangling and facing the public.

The theme has also been changed - the platform, which once was the skirt of the dancer moved by the wind, is now the dial of a clock - and the lighting system has been improved (all LEDs, to ensure lower power consumption and better performance over time).
